## Work Experiences

### Princeps Credit Systems Limited

Frontend Engineer

Lagos, Nigeria

Jul 2025 - Dec 2025

- Developed an admin dashboard enabling comprehensive oversight and advanced analytics for a digital savings and wealth-management platform managing over ₦9 billion in user transactions across Africa and international markets.
- Led the development of a private investment portal for internal stakeholders for accurate bookkeeping operations.
- Engineered interactive data views and efficient state management using Next.js, TypeScript, and Zustand, optimizing API-driven data flows and improving admin efficiency in account management.

### Meetro

Frontend Engineer

Lagos, Nigeria

May 2025 - Sept 2025

- Built event-creation and guest-list modules for an event management system used by 100+ users, creating responsive UI components and connecting to backend APIs to enable private event hosting and sharing.
- Implemented reusable components and optimized responsiveness to ensure a consistent experience across devices.

### Apexbyte Technologies

Software Engineer

Lagos, Nigeria

Sept 2024 - Feb 2025

- Directed development and maintenance of SaaS applications, resulting in a 50% improvement in workflow efficiency by implementing modular, reusable front-end components.
- Engineered and optimized a calendar scheduling app, increasing communication efficiency by 50% through a responsive UI and seamless API integrations.
- Reduced app load time by 40% and improved user retention through code-splitting, lazy loading, and caching.

### Signature Metal Cards

Frontend Engineer

Lagos, Nigeria

Jan 2024 - Sept 2024

- Pioneered building a scalable SaaS e-commerce platform, increasing user engagement by 35% through an optimized UI/UX and real-time data updates.
- Crafted innovative algorithms for real-time product sorting that enhanced item visibility and search precision; findings from A/B testing identified key adjustments to fix three significant causes of cart abandonment.
- Improved performance by refining state management, API response times, caching, and code-splitting, cutting checkout time by 30% and reducing site load time by 50%, which strengthened SEO and customer satisfaction.

## Volunteering

### Enyata

Frontend Engineer

Lagos, Nigeria

Mar 2025 - Jun 2025

- Built the Enyata Talentboard using Nextjs, implementing complex form handling for user onboarding and dynamic filtering logic that allows recruiters to search talents by skill and location instantly.

### Robotics and Artificial INtelligence - INnovators Network

Frontend Engineer

Lagos, Nigeria

Nov 2024 - Jan 2025

- Executed the first RAININ Hackathon and Summit websites, ensuring a seamless user experience for over 500 participants by optimizing page load speeds and improving engagement by 40%

## Technical Skills

- Languages:** TypeScript, JavaScript (ES6+), Python, Node.js, SQL, HTML/CSS.
- Libraries/Framework:** Reactjs/Nextjs, Vuejs/Nuxtjs, Expressjs, React Native/Expo, Tailwind CSS, SASS.
- Developer Tools:** Git/GitHub, Restful APIs, Agile, Zustand, RHF, Vercel, Figma, Webflow, UI Libraries, PostgreSQL.

## Projects

### VaultNova

- Developed a cross-platform mobile wallet using React Native and TypeScript, implementing a custom design system with TailwindCSS to ensure UI consistency across devices.

## Education

Miva Open University, Abuja - **B.Sc Software Engineering**
